Lineage 2 revolution vietnam gameplay

Lineage 2 Revolution has officially launched in Vietnam at the end of July. According to reviews from many players, the Vietnamese version still possesses a beautiful, quality graphics system. But not everyone uses the phone with enough configuration to download the game. If so, you can play Lineage 2 Revolution Vietnam right on your computer, via Android emulators. Currently, users can search for games on the Google Play Store to install on a computer. The following article will guide you how to install Lineage 2 Revolution on your computer. The following article will use the Nox App Player emulator. The other emulator users are doing the same. How to play Mobile Federation games on your computer How to install NoxPlayer to play Android games on computers How to play Three Kingdoms Mobile on PC Instructions for Installation Lineage 2 Revolution on PC Step 1: You open the Nox App Player emulator on your computer and then click on the search for Lineage 2 Revolution on the Google Play Store . Or you can immediately click lineage 2 Revolution game into the emulator interface, because currently the game is the first in the role-playing game. Step 2: Click the game and then click the Install button to proceed with the installation. Step 3: Click Accept to accept the terms and conditions of installation on the game. The player then waits for the game installation process to complete on the computer. When you're done, click Open to open Lineage 2 Revolution on your computer. Step 4: This will be the first interface of the Lineage 2 Revolution in Vietnam version installed on pc, via nox app player emulator. Step 5: Clicking on the screen will launch the game login interface. It will log in via Facebook, Google or create a username. If you don't have an account, click Register . Players enter a name and password to register an account. Please note that the password will only be allowed between 6 and 16 characters. Step 6: When you successfully register, you will see account information, click Continue to Games. Step 7: Next we will perform the process of creating characters to play in the game. Select the game server you want to play from the list and click OK to continue. Step 8: The process of accessing the server will be relatively long. The player will then perform the process of creating characters with the character selected for the character, press Next . Step 9: Choose the hairstyle, select a trade, enter a nickname for the character in the game, and then click Create Character . Step 10: First you enter level 1 to become familiar with gameplay and game content, press the Play button below. Step 11: The first will be the content of the automatic task execution. We will have the task to perform, click accept quest. The attacks in the mission will take place automatically. The first tasks will be extremely simple and not too complicated. Players will participate in the adventure to different countries to perform tasks as standard systems. When you complete the task, the will receive their reward. Lineage 2 Revolution Vietnam version still shows the appeal of the original. The initial work will mostly accomplish the task of getting the reward only. The later the content will attract more players with more challenging challenges. See more: How to play Lien Quan Mobile on PC with NoxPlayer How to copy data from computer to BlueStacks? Fix Bluestacks Initializing load error permanently on the main screen Wish you all have fun playing games! 2016 mobile MMORPG video game Lineage 2: RevolutionDeveloper(s)Netmarble NeoPublisher(s)Netmarble GamesSeries.LineageEngineUnreal Engine 4Platform(s)Android, iOSReleaseKOR: December 14, 2016WW: November 15, 2017Genre(s)MMORPGMode(s)Multiplayer Lineage 2: Revolution is a massively multiplayer online role-playing game (MMORPG) developed by Netmarble for mobile platforms under license from NCSoft, which takes place 100 years before the events of NCSoft's Lineage II: Goddess of Destruction storyline. [1] It is part of the Lineage series. Gameplay Like many MMORPGs, the player begins by creating a character and choosing his race. Available breeds are: Human, Elf, Dark Elf, Dwarf, Orc and in the latest update, the Kamael. Each race specializes later in different classes, such as warrior, mage, and archer. The player progresses through the game by taking missions and killing mobs. [citation needed] The vast majority of the game, however, is afk grinding. The game takes place in the same world of Lineage II, originally released in 2003, and features instanced dungeons, player versus player (PvP), clan wars, raids and a series of missions to bring the story line. [2] However, the gameplay has been specifically adapted to better suit netmarble mobile devices; [3] for example, missions are automated, with the character performing them automatically and even killing enemies alone after choosing a quest. [4] Developed by South Korea's Netmarble, the game was first released in South Korea on November 14, 2016. [5] It was launched in western countries on 15 November 2017. [6] The game was set to drop in Japan in the third quarter of 2017, followed by China in the fourth. [7] Receiving ReceptionAggregate scoreAggregatorScoreMetacritic74/100[8]Review ScorePublicationScoreTouchArcade[9] The game has been well received in some markets. By December 31, 2017, the game had passed \$100 million in 18 days. As of January 14, 2017, the game had grossed ₩206.5 million (\$176.6 million) within its first month in South Korea. [10] Overseas, it became the highest-grossing app on Apple's App Store in Japan just 18 hours after its debut,[12] surpassing 1 million pre-registrations for the U.S. and Europe launch,[11] generating 45% of Netmarble's revenue in September 2017[update]. [13] The game went on to gross \$980 million worldwide in 2017, becoming the seventh highest-grossing mobile game of the year. [14] As of December 2018[update], the game has more than 30 million players. [15] It earned over 1.5 dollar dollar by January 2019,[16] and has been estimated at USD 1.7 billion as of October 2019[update].
